

## ❖ Key Points

### ➤ Purpose

- Mission Statement: To create an equal-opportunity and accessible college experience for underclassmen KAAP students through uniting underclassmen with upperclassmen in a Peer Mentorship program that educates, inspires, and prepares students for a career in the health sciences.
- We want to separate ourselves from other RSOs by providing a “Greek Organization” experience without the added fees
- We want to expose KAAP students to the different aspects and careers of health care that can arise through our department that is not limited to Physical Therapy
- Become a wealth of knowledge and experience
  - This way, when one of us gets out landing internships, we can potentially recommend other people within the RSO who are still starting up!

### ➤ Peer Mentorship

- Major-Major pairing
  - Upperclassmen with incoming Underclassmen
  - Grad students will be featured to provide insight, as well.
- Why do people not commit to attending RSOs? There is no levels of commitment to encourage people to come back. Solution: Peer Mentorship.

### ➤ Membership

- Specifically for ALL KAAP students.
